# ASAD RAKHMANI

GitHub | lacke15@mail.ru | Telegram: @AsadR22 | +7 999 245 84 90

#### **EDUCATION**

ITMO University 2021 - 2025

Applied Mathematics and Computer Science

National Tsing Hua University of Taiwan spring 2023

Exchange Program as a Computer Science Student

Vega University winter 2022

Winter School of Financial Mathematics 'Quantaton'

Sirius University summer 2022

Summer School of Artificial Intelligence 'AIRI' (RDLS + RAII)

ITMO University 2020-2021

Course on Algorithms and Data Structures at a High School

#### ACHIEVEMENTS

# Diploma for the Best Project at the Sirius Summer School

Link(GitHub)

Object tracking on images using text queries

Merging a library for segmentation/detection - MDETR with a library for object tracking - SORT

# First place in the Hackathon by VKontakte (VK) on machine learning

Link(GitHub)

binary classification problem on text data

text data in BoW format were converted into embeddings (Word2Vec was used to convert some types of text data) and normalized, after which a model from the catboost library was trained on them

## Winner of the All-Russian Olympiad for Schoolchildren in Programming

Winner of the All-Russian Olympiad in Informatics

#### ПРОЕКТЫ

 $Bimap \mid C++$  Link(GitHub)

a data structure that stores a set of pairs and efficiently performs key-by-value lookups. Unlike map, search in bimap can be performed both on the left (left) elements of pairs and on the right (right).

## Image auto contrast | C++ & OpenMP

Link(GitHub)

The program automatically corrects the contrast of ppm and pgm images. For speed of work, the OpenMP parallel programming library was used.

# PNG to PPM image converter | C++

Link(GitHub)

#### **SKILLS**

Programming languages: C++, Python, Java

Tools&Other: Git, Clion, STL, OpenMP, numpy, matplotlib, pandas, seaborn, Docker
